CONVERT
▶ ▶ ▶ ▶ ▶ ▶ ▶
VHS TO DVD

GET ORGANIZED

1. Find your old family movies on VHS. Try to make an educated guess as to how many minutes of content they hold.

2. Buy some DVD-Rs. When you are shopping for DVD-Rs pay special attention to how many minutes of recording time the DVD-R can hold. For example, it might say "120min."

3. Set aside some time to come to the Library to do your conversion. The machine works in "real time". 1 hour of video will take 1 hour to convert.

DUBBING YOUR DVD

4. Insert the VHS and DVD-R into the machine.

5. Hit Play. Make sure the VHS is playing OK. Use the tracking buttons to smooth things out.

6. Rewind your VHS before the next step.

7. Hit the [DUBBING] button located behind the front panel. (You do not have to press Play.)

8. Grab a book and a cup of coffee and wait!

FINALIZING YOUR DVD

9. When your video is done, press [⏏ / ■] on the VCR, then wait until the disc reads 100%.

10. You can put content from more than one VHS onto the same DVD. Just go back to step #4.

11. When you are completely done use the **DVD remote** to Finalize:
    → Click [SETUP] on the remote
    ⟶ Select {DVD Menu} on the screen
    ⟶ Select {Finalize} on the screen

12. To eject your VHS Press [⏏ / ■] on the VCR.
